Fall is an excellent time for planting most Rock Plants and Alpines. Fall planting usually means a sturdier plant and more flowers than one planted in Spring. We particularly urge the Gardeners in the warmer states to plant in Fall as our plants are usually frozen solid at the height of your Spring season.

Some of the rarer sorts are usually sold out early in Spring. Order yours now for Fall delivery and be sure to have them. Make your selection now from our 1953 price list and send it along with your dwarf bulb order. Our Fall season extends from Sept. 15th to November 15th.
